## BUTYL ADHESIVE SPECIFICATIONS

### 1.0 DESCRIPTION

The Butyl Adhesive shall consist of a pressure sensitive, self adhesive pad capable of securing the plastic base of a delineator post to asphaltic pavement or concrete. The pad shall retain the base with post to the road surface during repeated impacts from a typical passenger vehicle.

### 2.0 GENERAL REQUIREMENTS

The Butyl Adhesive pad shall have dimensions of eight (8") inches square by three sixteenths ( $3/16$ ") inches thick and be supplied with slip sheeting on both sides of the pad. The pad shall be gray or black in color and have a density of  $\pm 12$  lbs./gal.
