

QUICK-CHANGE KONAPOST®

The KonaPost is an excellent alternative to traditional orange cones. It is ideal for applications where orange cones or markers must be quickly deployed in specific patterns on a regular basis. The flexible KonaPost's 6" (152.4mm) plug is easily inserted into a hot-dip galvanized steel receptacle that is recessed into the pavement. The posts can be deployed when needed and quickly removed by lifting them out of the pavement receptacles.

CONES	KONAPOSTS
Haphazard	ACCURATE
Damaged	DURABLE
Lost	SECURE
Random	CONSISTENT
Inadequate	EFFECTIVE
Cheap, Quick Fix	LONG TERM VALUE
Safety Risk And Increased Liability	SAFER

Tested to withstand over 200 impacts and rollovers!

HEAVY DUTY KONAPOSTS

Receptacle Part #	Size
2744000-0000	8" depth 4 1/2" x 4 1/2" flange (203.2mm)(114.3mm x 114.3mm)

Install and remove in seconds by placing probe into receptacle! Specify color and reflective sheeting when ordering.

Standard Colors: Yellow, Orange and White (Custom Colors Available Reflective Sheeting) – see page 12

THE RETRACTOR®

The Retractor is an automatic retractable lane delineator that guides and channelizes traffic at locations requiring repetitive lane usage or traffic pattern changes. The Retractor's durable and flexible delineator post can be automatically raised into position from a remote location to provide positive guidance to traffic. When not in use, the system's electric motor lowers the delineator post into a recessed cartridge. Post height is 36" (914.4mm) with a 3" (76.2mm) diameter.

Call today, to find out how the Retractor System can be custom configured for your specific application.
