SURFACE MOUNT INSTRUCTIONS

FOR INSTALLATION ON ASPHALT OR CONCRETE

BOTH SURFACE MOUNTS ARE DESIGNED TO ACCOMMODATE THE ENTIRE LINE OF FLEXIBLE GUIDEPOSTS AND SIGNS

SURFACE MOUNT PIN LOCK BASE

- FOR STANDARD BASE, INSTALL WITH ARROW AND SLOTS FACING TRAFFIC, IF SIGN IS INSTALLED ON POST, ARROW AND SLOTS MUST FACE DIRECTION OF SIGN.
- INSERT POST AND DRIVE LOCKING PINS IN PLACE WITH HAMMER.
- TO REMOVE POST, USE DRIFT PIN TO REMOVE LOCKING PINS, THEN LIFT POST FROM BASE.

1. A CLEAN DRY SURFACE IS REQUIRED.
2. MIX 5oz. PART "A" AND 5oz. PART "B" OF 1011 CONCRESSIVE EPOXY OR EQUIVALENT.
3. APPLY EPOXY EVENLY TO BOTTOM OF BASE.
4. PRESS BASE DOWN FIRMLY ON SURFACE UNTIL A BEAD OF EPOXY APPEARS AROUND EDGE.
5. ALLOW TO CURE APPROXIMATELY ONE HOUR BEFORE INSTALLING POST (ALLOW EXTRA TIME FOR COLD WEATHER.)

SURFACE MOUNT TWIST LOCK BASE

- FOR TWIST LOCK BASE, INSTALL WITH ARROW FACING TRAFFIC, IF SIGN IS INSTALLED ON POST, ARROW MUST FACE DIRECTION OF SIGN.
- INSERT POST AND TWIST RIGHT TO LOCK IN PLACE.
- TO REMOVE POST, DEPRESS POST, TURN TO LEFT AND LIFT TO REMOVE.

SUB-SURFACE MOUNT INSTRUCTIONS

The "SST" is installed in a 4" diameter core-drilled hole 1-7/8" deep. The "SLT" hole is 4" in diameter and is 2-1/8" deep. Line the sides and bottom of the hole evenly with approximately 6 oz. of compressive epoxy.

Make certain the hole is dirt free and there is an adequate amount of epoxy in the bottom of the hole so there are no air pockets.

Depress the SST base until lip is flush with surface or the SLT base is level with the surface. Make certain the base is positioned correctly for sign or delineator direction.

SMA

WEIGHT: 1 LB. 8 OZ.

SMT

WEIGHT: 1 LB. 4 OZ.

SST

WEIGHT: 8 OZ.

SLT

WEIGHT: 8 OZ.
